# LUCAS VACIS

**Senior QA Automation Engineer | SDET | AI-Assisted Quality Engineering**

Buenos Aires, Argentina | lucasvacis@gmail.com | +54 9 11 3195 1392 | linkedin.com/in/lucas-vacis

## PROFESSIONAL SUMMARY

Senior QA Automation Engineer with 7+ years of experience building scalable quality engineering solutions for web, API, and integrated systems. Specialized in Cypress, TypeScript, Jest, REST and GraphQL testing, CI/CD quality gates, and maintainable test architecture for modern product teams. Strong track record improving automation reliability, reducing regression effort through parallelization and concurrency, and embedding quality across the delivery lifecycle. Hands-on with AI-assisted engineering workflows using tools such as GitHub Copilot and CodeX to accelerate test design, refactoring, debugging, documentation, and automation delivery while maintaining engineering rigor.

## CORE COMPETENCIES

- QA Automation Strategy, Quality Engineering, Test Architecture, Scalable E2E Framework Design
- UI Testing, API Testing, Integration Testing, Regression Strategy, Smoke Testing, Critical Path Coverage
- Cypress, TypeScript, Jest, Selenium, Cucumber, Playwright exposure, Postman, GraphQL, REST API validation
- Parallel Test Execution, CI/CD Quality Gates, GitHub Actions, PR Environments, Staging Validation, Release Readiness
- AI-Assisted Engineering Workflows, GitHub Copilot, CodeX, Prompt-Driven Documentation, Automation Acceleration
- Defect Analysis, Reporting Strategy, Cross-Functional Collaboration, QA Process Improvement, Mentoring

## PROFESSIONAL EXPERIENCE

**Sr QA Automation Engineer (SDET) | Forte Group / NBC SportsEngine**

08/2024 – Present | US

- Lead QA automation efforts for web applications and APIs supporting user, household, and organization management workflows in a large-scale product ecosystem.
- Design, develop, and maintain Cypress + TypeScript frameworks for end-to-end, regression, and integration testing with emphasis on maintainability and long-term scalability.
- Implement parallelization and concurrency strategies in CI pipelines, shortening feedback loops and improving build efficiency for pull requests and release validation.
- Validate REST and GraphQL services and collaborate on quality gates in GitHub Actions, staging environments, and PR preview apps.
- Drive QA process improvements, including readiness criteria, QA review practices, reusable test patterns, and collaboration models with developers and product stakeholders.

**Sr QA Automation Engineer | Distillery / Scorpion**

02/2022 – 08/2024 | US

- Designed, created, and maintained UI automation suites using Cypress, Cucumber, and TypeScript to strengthen regression confidence and release readiness.
- Performed front-end, back-end, and GraphQL testing across queries and mutations to validate product behavior across layers.
- Contributed to CI/CD pipelines and automated quality checks, helping teams scale regression coverage and improve delivery consistency.
- Partnered closely with developers, product owners, and stakeholders to embed quality into Agile planning, execution, and release decisions.

**Sr QA Engineer | CocoPago**

06/2021 – 02/2022 | US

- Planned, estimated, and executed structured test strategies across web and mobile applications, including functional, backend, and cross-browser validation.
- Automated regression scenarios with Selenium and Java and used Postman to support API validation and service-level verification.
- Tested IPA and APK builds for iOS and Android while collaborating with product and engineering teams on issue triage and release quality.

**Sr QA Automation Engineer | GlobalLogic / Claro**

12/2020 – 06/2021 | Argentina

- Created detailed test plans and implemented automation suites using Selenium, Java, TestNG, and Page Object Model for core web workflows.
- Migrated manual regression scenarios into a more scalable automation approach and performed REST API validation through response and log analysis.

**QA Automation Engineer | Cognizant Softvision / Schneider Electric**
07/2020 – 12/2020 | Argentina

- Performed automation and manual analysis for web and backend applications using .NET, Selenium, NUnit, Postman, and Azure DevOps.
- Built and maintained automated suites, test cases, and execution plans to improve defect detection and sprint-level coverage.

**QA Analyst | Rappi**
05/2019 – 07/2020 | Argentina

- Validated end-to-end integrations and business-critical features through functional and REST API testing.
- Migrated manual cases into Katalon Studio and trained QA team members on automation usage and troubleshooting.

**QA Analyst | MRM//McCann**
09/2017 – 05/2019 | Argentina

- Executed manual testing for websites and supported release activities with strong coverage across regression, smoke, and integration scenarios.
- Collaborated with US-based teams to align requirements, communication, and release quality expectations.

## TECHNICAL SKILLS

**AI & Engineering Productivity:** GitHub Copilot, CodeX, AI-assisted debugging, AI-assisted test design, prompt-driven documentation, engineering acceleration
**Automation & Testing:** Playwright, Cypress, Jest, Selenium WebDriver, Cucumber, Katalon, TestRail, Selenium IDE
**Languages:** TypeScript, JavaScript, Java, C#, SQL
**API & Service Testing:** REST API, GraphQL, Postman, API validation, schema and response verification
**CI/CD & Quality Delivery:** GitHub Actions, Azure DevOps, CI/CD pipelines, PR environments, release validation, Vercel, AWS Secrets Manager
**Architecture & Practices:** Test architecture, parallelization, concurrency, test maintainability, quality gates, reporting strategy, test design, Agile QA process definition
**Observability & Collaboration:** New Relic, Datadog, Jira, GitHub, Scrum

## EDUCATION

**Bachelor's Degree in Information Technology** — Escuela Argentina de Negocios
03/2019 – 12/2021 | Partial completion

## CERTIFICATIONS & TRAINING

- The Complete Cypress v12 Course — Automation Testing Bootcamp (Udemy)
- Cypress with TypeScript — Test Automation University
- Selenium WebDriver with C# for Beginners + Live Testing Site (Udemy)
- Automate Everything with Katalon Studio (Udemy)
- Selenium WebDriver with Java for Beginners (Udemy)
- Full Stack Web Developer — Coderhouse
- Front End Web Developer — DigitalHouse

## LANGUAGES

**English:** Advanced C1 / Professional proficiency
